Wiki page for Lab Asmt 5

- Create a basic login with 2 buttons “Login” and “Register”
    - On clicking “Login” button, user should be navigated to “Home” page
    - On clicking “Register” button, user should be navigated to “Registration” page
- Home page should have a Mashup using at least Two Web Services (refer to the web services from the following link). One of them should be from the list of knowledge services and they should be different from the two services you used in your Lab 3 assignment.
- Also create a mobile application related to your project. Application should have good UI/UX. Design a good UI using a wireframe tool.
