CS551 Advanced Software Engineering

In-Class Exercise (ICE-8): Oct. 11 (T), 2016 Software Architecture

ClassID: 52

Name: Lava kumar S

Consider the following diagram and describe the architecture style. Describe the design rationale with the statements of reasoning underlying the design process that explain, derive, and justify design decisions.

AEST Ful HTTP interface is a great way to allow or client side application to talk to the Server. There are two types of transaction within a REST System. The first uses & GET and POST is transaction caused out every day by the coeb berowser. The client, has no direct across to manipulate resources but
